

# Hot Melt Adhesive

## Polyurethane Reactive (PUR) Hot Melt Adhesive

### FAST SET. STRONG PERMANENT BONDS.

#### THE ADHESIVE

- Interior/Exterior waterproof.
- Versatile - works on a variety of materials.
- Reduces the need for mechanical fasteners.
- Solvent free and nonflammable.
- Eliminates the use of nails or staples, reducing the time and money in filling, sanding and staining repair marks.
- 50-gram cartridges allow for less waste. Each cartridge contains approximately 71 feet of adhesive with a 1/16" bead.
- Stronger than conventional hot melts because of the "cross-linking" reaction that occurs after the hot melt has cooled.
  - Cross-linking is the second phase of the HiPURformer process where the adhesive reacts with the moisture in the air to form an extremely strong chemical bond. At this point, the adhesive penetrates both the substrate and the adhesive itself to make a "chain", thus making it stronger, and more permanent, than traditional hot melts. The cross-linking bond begins forming over a period of time from hours to days and the bond strength builds proportionately.

#### MP75 – 75-SECOND SET

- Versatile Performance – bonds most anything. Metals, Aluminum, Brick, Ceramic, Concrete, Fabrics, Foamboard, FRP, Glass, Marble, Most Plastics, Melamine, Steel and Leather.
- Ideal for all repair projects.
- Longer open time for precise assembly.

#### WW30 – 30-SECOND SET

- Ideal for general woodworking and professional cabinetry.
- Reduces the need for clamping.
- Designed for quick assembly projects.

#### WW60 – 60-SECOND SET

- Ideal for general woodworking and professional cabinetry.
- Fills gaps and irregularities.
- Reduces the need for clamping.

# Hot Melt Adhesive

## Polyurethane Reactive (PUR) Hot Melt Adhesive

**Sets Fast. Reduces The Need For Clamping. Cost Effective.**

### THE KIT

- 1 Cartridge Gun
- 1 Carrying Case
- 1 Cartridge Base (Charger)
- 3 Adhesive Cartridges
- 1 Instruction Manual

### THE APPLICATOR

- Cordless, lightweight and extremely easy to use.
- Patented, innovative adhesive applicator.
- Efficient and cost effective.
- Less waste than other hot melt adhesives.
- Heats up in 10-13 minutes.
- Holds the heat for 20 minutes.

**WORKS on many different surfaces.**

Including ceramic tile, brick and metal.
