

ANNULAR CUTTERS & PILOT PINS

Supplemented with Plus 20 Coating for durability and strength.

High Speed Steel Finish (HSS) and Plus 20 Coating available in three depths.

ANNULAR CUTTERS

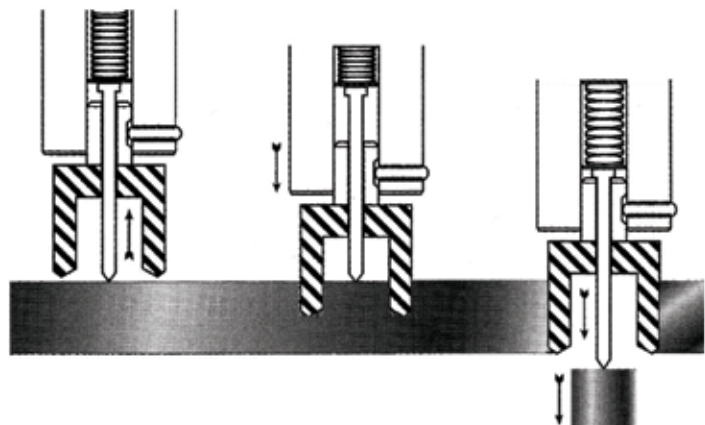

- These rugged cutters are perfect around the shop or any job site.
- Designed to allow quick penetration and a clean cut with burr-free holes.
- Only the periphery of the hole is cut - the pilot pin ejects the center as a steel slug.
- Available in one, two and three inch depth of cut.
- Designed so cutting fluid is injected into hollow of cutter acting as a coolant and lubricant, making cutting easier, more efficient and reducing wear and tear on the cutter.

PLUS 20 COATING

- Plus 20 Coating gives 20% more tool life and 20% higher performance than standard high speed annular cutters.

PILOT PINS

- DCT pilot pins are a vital part of annular cutting for precise location when drilling.
- Provides a guide for steady flow of cutting fluid to cutting edges of the annular cutter.
- Ejects the slug when completed.
