

# MASONRY DRILLS

**DCT carbide tipped, deep flute drills pulverize through a variety of masonry materials.**

## Contract Series Masonry Drills

- Carbide tip bites into the toughest masonry products with minimal wear. Carbide also withstands heat so you can use these drills all day long making hole after hole.
- Deep flute design is extremely effective on materials that produce a coarse powder or gravel when drilled.
- Grinds through concrete, brick, terra cotta, sandstone, cinder block, ceramic tile, and slate.
- Available in 4-inch and 6-inch lengths.
- Larger diameter drills have 1/4" reduced shanks.
