

ELECTRO- MAGNETIC DRILL PRESS

Same cutting capacity as machines weighing much more. Cuts high quality holes quickly, economically, and completely.

Built to last, this unit can be used on the jobsite or in the shop. This system penetrates quickly, cutting clean, burr-free holes. More than a ton of magnetic strength in the base allows this drill to be mounted vertically, horizontally or overhead. This force helps to avoid the wandering associated with hand held drills. As only the periphery of the hole is cut, the pilot pin quickly ejects the center as a plug of steel.

- 1-3/8" cutter capacity, 2" depth
- 1200 Watt powerful motor
- Quick release arbor enables cutter change in seconds
- Uses regular annular cutters and carbide tipped annular cutters
- Easy to maneuver, weighs only 23 lbs.
- Powerful magnetic strength of 2,200 lbs.
- Motor is mounted to the frame in 3 points for greater rigidity
- RPM 600

Kit includes: Protective molded plastic carrying case, safety chain, tools, safety guard and external coolant system.

Applications:

- Bridge & Highway Maintenance
- HVAC & Elevator Repair
- Mining & Construction
- Refineries
- Ship Building & Railroad Yards
- Steel Erection & Fabrication
- Truck & Trailer Manufacturing
- Welding
