

MULTI-STEP 3-PIECE DRILL SET

DCT Multi-Step Drills provide longer lasting chatterless operation over ordinary step drills.

These Multi-Step Drills have a graduated step design that creates clean, accurate, burr free holes of multiple diameters in all sheet metals up to 1/8" thick. The non-slipping, self starting tip eliminates the need for pilot hole drilling, while the balanced double flute provides less chattering.

This Multi-Step Drill Set is perfect for schools (lockers, metal cabinets, etc.) junction boxes, switch boxes, metal studs, electrical appliances, lighting fixtures, PVC, Plexiglas, wood composition board, auto body repair and more.

Available Individually In 7 Sizes!

Set Includes:

Diameter	Number of steps
DMS 1/2" x 1/8"	13
DMS 1/2" x 3/16"	6
DMS 3/4" x 1/4"	9

Drill up to 13 drill sizes without changing bits!

- 3pc kit contains 1 each.
- Packed in Hi-impact plastic and foam protective case.
