

# SPADE STYLE WOOD BORING BIT 6-piece SET

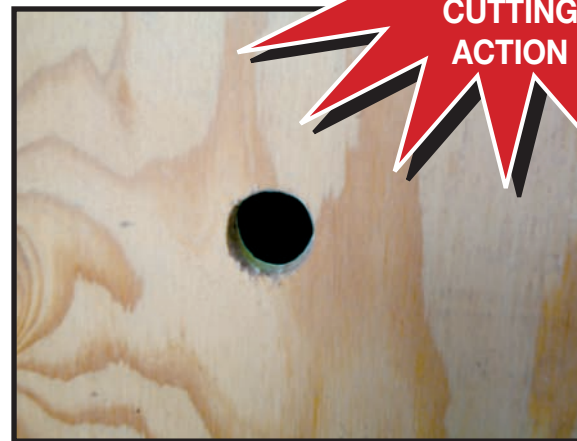

***The Spade Drill Set that no "handyman" or construction professional can do without.***

*The simple design of these spade style wood boring drills creates a scraping rather than a cutting action, which means the wood fibers are torn rather than cut. These drills are great for rough carpentry tasks including counterboring bolt holes, drilling through studs and constructing cabinets and shelving.*

*Spade style drills are designed to quickly bore holes through all types of hard and soft woods, including plywood. These drills perform best at high RPM and are easy to sharpen.*

- **Handle Rough Carpentry Tasks**
- **Counterbore Bolt Holes**
- **Drill Through Studs**
- **Construct Cabinets & Shelving**

**SIZES:** 3/8", 1/2", 5/8", 3/4", 7/8", 1"
