

ROPE LOCK TIE DOWN

OFFERS BETTER HOLD DOWN POWER THAN ROPE OR BUNGEEES

The Rope Lock is easy to use.
Simply attach the two hooks and pull the loose end of the rope to get the tightness you need. The load will stay secure because the rope stays locked in place with every pull until you release it using the convenient Thumb Lever.

If it needs to be tied down or hoisted the Rope Lock Tie Down makes it simple. Its XRT patented design pulls tight, locks in place, will never break or slip, and will not rust.

8 foot braided polypropylene rope and coated zinc plated steel hooks allows you to secure a wide variety of loads quickly and easily.

Features:

- Maximum load capacity of 250 lbs.
- Heat and cold resistant.
- Lightweight yet strong.
