

HEARING PROTECTION

SKU #
#04949 earplugs with cord (100 prs/box)
#05484 earplugs without cord (100 prs/box)

Protect employees' hearing with noise reduction rated earplugs.

Sound is measured in decibels. A normal conversation takes place at about 60 decibels. A wood shop noise might measure about 100 decibels and a chainsaw will be about 110 decibels. Prolonged exposure to 85 decibels can cause hearing loss.

The National Institute for Occupational Safety and Health (NIOSH) estimates that more than 9 million workers are exposed to dangerous noise levels. Noise-Induced Hearing Loss (NIHL) occurs over time and usually does not become apparent to the employee until it's too late to do anything about it.

- **Meets ANSI standard S12.13-1991 for approved hearing protection**
- **Provides a Noise Reduction Rating (NRR) of 29 dB**
- **Made of comfortable, non-allergenic foam**
- **Durable, cone-shape forms to ear for a custom fit**
- **Once inserted, expands to fill ear canal and block excessive noise**
- **Reduces the danger of hearing loss when used as directed**
- **Durable, soft braided cord helps prevent loss of earplugs**
- **Cord drapes comfortably without twisting or binding**
- **Cord can be worn under chin or around neck and will not interfere with movement**

Used By:

- Industrial
- Manufacturing
- Machinists
- Road Crews
- Grounds Care
- Construction
- Utility Workers
- Maintenance Crews
