

HEARING PROTECTION SAFETY EYEWEAR

Hearing and eye protection in one convenient package.

These unique safety glasses have an innovative built-in hearing protection system incorporating two important industrial safety needs in one handy product. The nylon slide tethering system guarantees that ear plugs are always within easy reach of the wearer, available when needed and out of the way when not.

FEATURES:

- Glasses have a lightweight, contemporary design with polycarbonate lenses that absorb 99.9% UV
- Soft plastic nose bridge provides added comfort and adjustability
- Ear plugs extend over 4.5" for easy insertion into ear canals
- Nylon slide allows easy extension and retraction of tethered ear plugs
- Designed to allow easy removal of ear plugs for replacement and cleaning
- Both styles of ear plugs meet all OSHA and ANSI requirements and glasses meet the requirements of ANSI Z87.1-2010

EAR PLUGS - AVAILABLE IN TWO OPTIONS:

• **DuraFoam™ Ear Plugs:** designed for optimal compliance and increased comfort. The special foam is formulated for softness, with a smooth outer surface that won't irritate the ear canal. The bright orange color makes for easy compliance checks. DuraFoam plugs are easy to screw ON/OFF for replacement and have a Noise Reduction Rating of 30.

• **PermaPlug™ Ear Plugs:** Two piece co-molded design uses two different durometers (hardness) to achieve an ultra comfortable fit with a stiff core for ease of insertion. The triple flange design insures proper fit and they are easy to screw ON/OFF for replacement. Featuring a Noise Reduction Rating of 25

Both ear plug styles available in Clear or Smoke safety glass styles.
