

# DUST MASKS

SKU # 05249  
(20/box)

SKU # 05250  
(10/box)

## Protect employees from exposure to unhealthy airborne dust and vapors.

Dust masks shield the tiny specks of matter that pollute the air. The particles that can't be seen are the most dangerous as they penetrate deeper into the lungs where they can irritate for years. Employees in dusty work environments need the protection of a dust mask.

### Dust & Mist Approved Respirator

- Lightweight and disposable
- Protect employees from dust, powders, pollens and other airborne mutants
- Engineered for added comfort - soft inner face piece, adjustable nosepiece, and foam inner seal
- N95 rating

### Respirator with Exhalation Valve

- Exhalation valve reduces hot-air build up keeping workers cooler
- Dura-mesh shell helps mask last longer while making them reusable
- Flame retardant
- Shaped for comfort with contour molded nose bridge
- N95 rating
- Protects against most welding fumes
