

HAND HACK SAW

Ergonomic handle maximizes cutting control and power.

Ergo® Hand Hack Saw

- Ergonomic design with very high blade tension for straight, accurate and fast cuts
- Centered blade for correct balance and reduced cutting effort
- Alternative 55° blade mounting for flush cutting
- Supplied with reliable and shatterproof 12" bi-metal blade with 24 TPI
- Single touch spring-loaded blade release mechanism for quick blade changes

SKU	Description	Blade Length (inches)
07097	Ergo® Professional Hand Hack Saw	12

Bi-Metal Hand Hack Saw Blades

- Precision ground teeth for all kinds of metal sawing
- Virtually unbreakable - blade back made of strong, flexible spring steel with a tooth line of high-alloyed super high speed steel
- Bi-metal construction guarantees the blade to keep its sharpness for a long time
- Combine extreme cutting performance and wear resistance with a high degree of flexibility
- Vastly superior to all-hard speed blades or conventional, flexible blades
- Available in 10 packs of 14, 18, 24 or 32 teeth per inch (TPI)

SKU	Standard Pitch	TPI	UOM
07098	12" x 1/2" x .025	14	10-pack
07099	12" x 1/2" x .025	18	10-pack
07100	12" x 1/2" x .025	24	10-pack
07101	12" x 1/2" x .025	32	10-pack

The First Scientific Approach to Tool Design

Back in the early 1980's, BAHCO became one of the first toolmakers in the world to institute a scientific approach to designing truly ergonomic tools. The BAHCO11-Point Ergonomic Design Program starts with research into the end users, their tasks and the limitations of the tools they currently use. Their research has revealed that comfort and ease of operation are a tool's two most important characteristics. These tools are designed to reduce fatigue, cramping and injuries like blisters. By minimizing skeletal and neuromuscular strains, BAHCO tools help prevent long-term repetitive motion injuries and ultimately make life a lot easier for the professionals who use them.
