

SPEED THREADER

The best system available for cutting & repairing threads.

A must-have tool for tradesmen of all kinds, the Speed Threader allows you to cut or repair threads so quickly and easily, you'll have professional results in no time at all. This is mainly due to the design of the collar which consistently lines up your die with the bar stock so that you never have crooked or offset threads. Plus, the handle is attached to the die so you never have to worry about changing out dies again.

Key Features:

- Combines the die and the die handle in one convenient tool
- Self-centering guide eliminates cross threading
- Ensures proper alignment every time
- Ergonomically designed "easy-grip" handle is comfortable to use
- Eliminates dies and die stocks
- Can last up to 13 linear feet of steel rod—once it's spent, the whole tool is replaced—no more changing out dies

Used By:

- Automotive
- Plumbing
- Electrical
- HVAC
- Fasteners
- Maintenance & Shop
- Industrial/Manufacturing
