

COBRA PLIERS

Instantaneous adjustment, memory retention of jaw opening, and single-handed, self-gripping operation in a single tool.

The self-gripping jaw design grips so well that you could stand on the handle while it's wrapped around a pipe, or even hang from the handle without the pliers slipping out of place! The chrome vanadium steel gripping teeth are specially hardened to approximately 61 HRC and oil-hardened for longer tool life.

- Push button action for fast, firm adjustment
- Memory retention of jaw opening avoids unintentional adjustment
- Single-handed, self-gripping operation
- Work directly on piece
- Self-gripping jaw design allows perfect grip to eliminate burring of bolts, nuts and hex fittings
- The flat nose meeting at the jaw allows for precise work
- Design eliminates finger pinching
- Thin profile and light weight ensure ease of operation

Size	SKU	Pipes	Nuts	Positions
7"	08215	to 1-1/4"	to 1-1/8"	11 adjustments
10"	08200	to 1-1/2"	to 1-3/8"	11 adjustments
