

LOCKDRIVER™

Lock-On & Hold Hex Nut Driver

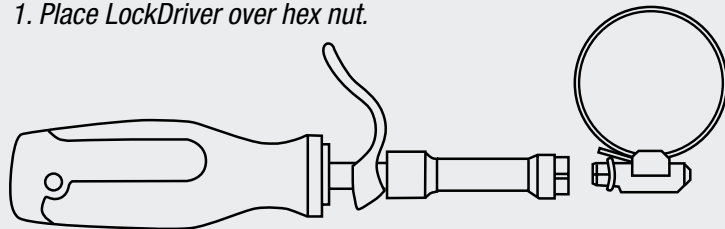

Simply place LockDriver on hex nut, lock the lever and turn.

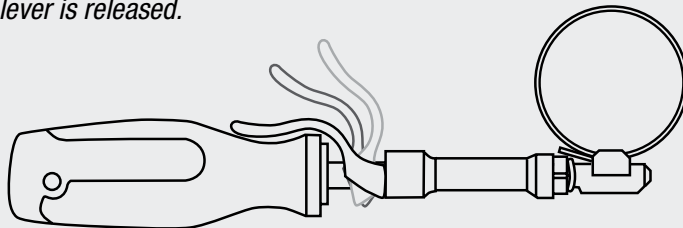

No plumber, auto mechanic or maintenance worker should be without the Lock Driver. It single-handedly locks onto hex nuts with just the flip of a thumb lever and stays on tight until the job is done. Great for tight or hard-to-reach places.

How It Works

1. Place LockDriver over hex nut.

2. Close the lever to lock the LockDriver head onto the hex nut. LockDriver remains locked in place until the lever is released.

Features

- Locks tightly onto hex screws
- Ensures a secure fit that won't slip
- Designed for confined, hard-to-reach areas
- Easy-to-use lever engages and releases with just a flip of your thumb
- Ergonomic, 3-sided handle for extra torque
- Chrome-plated shank

Ideal For

- Plumbing
- HVAC
- Industrial
- Automotive
- Maintenance
- Electrical
