

THREAD REPAIR

Internal and External thread restorers are the ideal tools for saving time during maintenance, plumbing, construction, agriculture, vehicle/fleet repair and other applications where there are components with damaged threads.

These hand tools automatically adjust to any thread and pitch, can be used on left or right hand threads, both inch and metric and need no prior measurement of the thread.

Internal, External and Combination Sets Available.

See Thread Repair Brochure for more information.

DCT DURABLE COMPONENT TECH

1-800-285-7965

P.O. BOX 15204, ST. LOUIS, MO 63110

INTERNAL:

The Power of the Internal Thread Repairer

- One hand tool restores inch or metric, RH or LH threads
- Self adjusting to any pitch
- Hardened cutting blades
- Nylon pads available for the internal to avoid marring softer metals or plastics
- Comes in 6 different sizes, ranging from 5/8" - 2 5/8" (8mm - 68mm)

EXTERNAL:

The External Thread Repairer replaces many dies

- One hand tool restores inch or metric, RH or LH threads
- Self adjusting to any pitch
- Automatically chases good threads
- No need for calibration or identifying fastener thread type
- Comes in 3 different sizes, ranging from 5/32" - 5" (4mm - 128mm)
