Safety Plus Kit

CPRotector

## Excel at First Aid.

Whether working on a computer, an assembly line, in a plant, in the field or around the shop, First Aid Kits are an important piece of safety equipment regardless of potential workplace dangers.

### Safety Plus and Safety Kits Feature:

- Sturdy plastic case with bracket for wall mounting
- Unitized contents that fit tightly into case to prevent shifting
- Single use packages which ensure uncontaminated product to treat injuries
- Glow in the dark lid for easy recovery
- Complete refills are available upon request

### Safety Kit

This general purpose first aid Safety Kit contains the necessary materials for treating minor injuries and other first aid emergencies, including cuts, scrapes, bumps and more.

### Safety Plus Kit

Employers are required to provide appropriate personal protective equipment such as gloves, gowns, face shields, masks, and eye protection in the event that employees are exposed to blood or other infectious materials. Our Safety Plus Kit combines a full bloodborne pathogen kit with a safety kit that meets both ANSI Standards and OSHA Requirements.

### CPRotector

With concern over HIV and Hepatitis, the CPR mouth-to-mouth barrier protects the rescuer from unsafe mouth-to-mouth contact. Its patented "Free Floating" valve allows better air flow to the victim.
