

BOOSTER PLUS™ MASONRY DRILL BITS

Power. Speed. Precision.

MONOBLOC CARBIDE TIP WITH 3 CUTTING EDGES

- **Self-centering point** - Helps achieve smooth and easy centering with little or no bit walk
- **Safer drilling against rebar** - Triple cutting edge reduces sticking when hitting rebar
- **Penetrates deck plate** - Chiseling effect drills through steel plate up to 1/16" thick, as well as through concrete

UNIQUE DESIGN OF SPIRAL FLUTE CHANNELS

- **Better dust removal** - Square section combines a compression channel with a depression chamber to draw dust out of while cutting
- **Better dust removal** - High-tech design of drill bit ensures longer wear and better performance over the life of the bit

SDS PLUS SHANK

High-performance hammer drill bits cut through the toughest masonry. No need to change bit when hitting rebar or deck plates.

The unique, high-tech design of this heavy-duty bit allows you to drill faster and more easily than conventional design - up to five times more holes compared to regular bits.

APPLICATIONS

- Drilling all masonry materials, including concrete, reinforced concrete, block, mortar, stone, hard stone, granite, ceramic, plaster, brick and sliding boards.
- Drilling pilot holes for concrete nails.

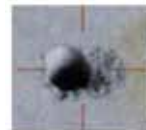

FEATURES

- Increased production - 5x more holes than two-cutter tips
- Improved drilling speed, compared to conventional tools
- Self-centering tip for accurate hole starting without bit walk
- Flat point angle delivers more power
- Excellent durability, compared to conventional designs

Drills a hole to near-perfect roundness

Booster Plus bit

Other bits

Advanced triple cutting edge tip provides safer drilling on rebar

Unique channel design offers more efficient dust removal during drilling
