

BRUSH CUTTING BLADES

CARBIDE TIPPED BLADES CLEAR AWAY UNSIGHTLY VEGETATION WITH EASE

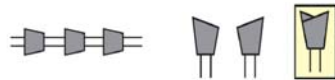

TENRYU is known around the world the premier in quality saw blades. The Brush Cutter Series from TENRYU is a high quality line of carbide tipped blades for cutting brush, weeds, saplings, and thick or matted grass with gas powered brush cutter and weed trimmer machines.

These blades are LONG LASTING and FAST CUTTING. They eliminate the need for wasteful and inefficient nylon string and far outlast conventional steel or plastic blades.

**SPECIALLY DESIGNED
INSERTED TOOTH FOR
EXCELLENT TIP RETENTION**

**TOOTH GEOMETRY SELECTED
FOR EFFECTIVE CUTTING UNDER
HIGH-IMPACT CONDITIONS**

ATB (Alternate Top Bevel)
Typical for cross-grain. Also used on ripping blades

UNIQUE FEATURES:

- For use with gas powered brush cutter/weed trimmer machines
- Individually hammer-tension steel plates for true run
- Tooth geometry and carbide hardness provide effective cutting under high-impact conditions
- Stronger and longer-lasting than conventional blades
