

CARBIDE TIPPED HOLE CUTTERS

CT5

CT7

Portable annular cutter can be used with any electric drill.

Champion Carbide Tipped Hole Cutters give you higher productivity and better performance. They are a better alternative to bi-metal hole saws, which burn out after 6-10 holes when used in steel applications.

- Champion Carbide Tipped Hole Cutters measure up to Annular Cutters, except no drill press is required
- Improved alternative to Silver and Deming Drills, offered in larger sizes
- Ideal portable tool for the professional electrician, mechanic, plumber, HVAC and general maintenance worker
- Use in corded or cordless drill
- One-piece construction - no changing of pilot pins
- Burr-free hole cutting
- Will not bind
- Safety collar stop prevents over penetration; speeds pull-out and transfer time
- Time-saving ejector spring pushes out slug
- Tungsten carbide teeth for excellent wear and heat resistance
- Non-uniform tip reduces vibration
- Extended tool life due to cutting through outside diameter instead of whole piece of steel

CT5

For cutting a hole up to 3/16" thick in a variety of materials: steel plate, iron, aluminum, copper, brass, cast iron, stainless steel, fiberglass and plastic.

CT7

For cutting a hole up to 1" thick in a variety of materials: pipe, thick steel, steel plate, iron, aluminum, copper, brass, cast iron and steel.
