

# UTILITY LIFT SYSTEM

## POWERFUL MAGNETS LIFT HEAVY MANHOLE COVERS WITH EASE

The powerful rare earth magnets and exclusive magnetic switching system featured in the **Utility Lift System** allows for a safer solution to the problem of removing, moving and replacing manhole and valve box covers. Injuries are drastically reduced, as well as the time it takes to deal with heavy, cumbersome covers.

### Magnetic Valve Box Lifter

The powerful magnets and lightweight, ergonomic design of our **Magnetic Valve Box Lifter** makes it possible to safely and easily move heavy and awkward valve box covers.

Simply apply the **Magnetic Valve Box Lifter** to the box cover, hold it in place with your foot, push handle down and turn until it locks to activate the magnet. The cover can now be easily lifted off. Reverse the procedure to replace the cover.

- Easy on/off switch activates magnetic power instantly
- Removes valve box covers in less than 60 seconds
- Handle locks for safety
- Rated for cast iron covers less than 50 lbs.

Magnetic Valve Box Lifter	13122

Reduce back and hand injuries — thus reducing workmen's comp claims

### Magnetic Manhole Lifter

No more “manhandling” manhole covers – the **Magnetic Manhole Lifter** makes it possible to quickly, easily and safely handle large, heavy covers.

At only 44" when folded, the 23 lb. **Magnetic Manhole Lifter** is easy to handle and set up, going from truck to open manhole in less than a minute. Just apply the lightweight magnet to the manhole cover, activate the magnet by turning the locking the handle then attach the rolling dolly. Now use the power of leverage to easily lift and move the cover.

- Easy on/off switch activates magnetic power instantly
- Quick, easy setup
- Handle has 4 positions for leverage and locks for safety
- Lightweight and compact
- Rated for manhole covers up to 400 lbs.
